PROFESSIONAL SUMMARY

AI-focused Computer Science student at BRAC University and hands-on software developer building end-to-end, AI-integrated web and mobile products. Experienced with LLM integration, RAG-style context retrieval, structured AI outputs, REST APIs, authentication, relational and NoSQL databases, Flutter, React and Next.js. Technical Lead and Full-Stack AI Engineer for Desi Digest, selected among the Top 100 finalists from 3,626 participants at the Infinity AI BuildFest 2026. Strong focus on backend architecture, security, testing, documentation and reliable deployment.

SELECTED ACHIEVEMENTS

- Top 100 Finalist — Infinity AI BuildFest 2026 (3,626 participants), HealthTech track, with Desi Digest.
- Served as Technical Lead and Full-Stack AI Engineer, owning core architecture, AI/database integrations, production fixes and deployment.
- Built a confidential Flutter/FastAPI field-sales copilot with backend-verified GPS workflows and a latest backend suite of 159 passing tests.

TECHNICAL SKILLS

Languages: Java, Python, TypeScript, JavaScript, Dart, SQL, HTML, CSS

AI / LLM: Gemini, OpenRouter, Ollama, Qwen; LLM integration, RAG-style retrieval, embeddings, structured outputs, prompt and safety guardrails, multimodal/vision workflows

Backend & Data: FastAPI, Node.js, Express.js, REST APIs, JWT/OAuth, Supabase, PostgreSQL, MongoDB, Mongoose, Firebase, Firestore, Prisma, Zod, Pydantic

Frontend & Mobile: Flutter, React, Next.js, TanStack Start/Router, Vite, Tailwind CSS, Three.js

Testing, Security & Tools: Pytest, unit/integration testing, RLS, RBAC, secret isolation, rate limiting, Git/GitHub, Docker, Postman, Vercel, Render, Linux, Android Studio, VS Code, IntelliJ IDEA, PyCharm

SELECTED ENGINEERING PROJECTS

SalesBondhu AI | Lead Developer — AI Field Sales Copilot (Confidential) | 2026–Present

- Developing a production-oriented Flutter mobile app and FastAPI backend for field sales teams, with role-based salesman and manager workflows backed by Supabase/PostgreSQL.
- Implemented duty-aware GPS tracking, backend-verified visit start/end, route deviation and flagged-visit review, nearby-opportunity and daily-plan APIs.
- Built a context-aware AI Coach that replies in natural Bangladeshi Bangla and provides safe, backend-driven map, call and WhatsApp actions.
- Applied JWT/RBAC, server-side secret isolation, production gating, mobile secret scans and comprehensive API testing; latest backend suite: 159 passing tests.

Tech: Flutter, Dart, FastAPI, Python, Supabase/PostgreSQL, JWT, REST APIs, GPS/Maps, LLM integration

Desi Digest | Technical Lead & Full-Stack AI Engineer | 2026 [GitHub](#) | [Live](#)

- Built a culturally aware HealthTech nutrition platform for Bangladeshi and South Asian meals; selected as a Top 100 finalist from 3,626 participants at Infinity AI BuildFest 2026.
- Architected Supabase Auth/Postgres/Storage/RLS and developed Banglish meal parsing, photo-based plate analysis, AI nutrition chat, personalized health nudges and shareable reports.
- Implemented structured AI responses, safety guardrails, provider fallbacks and caching, plus production deployment and regression fixes.

Tech: TanStack Start/Router, React, TypeScript, Supabase, Gemini, Vercel AI SDK, Vite, Nitro

SELECTED ENGINEERING PROJECTS — CONTINUED

Research LaTeX Studio Beta | Full-Stack Developer | 2026 [GitHub](#)

- Created a Next.js application that reconstructs clean, compilable academic LaTeX from plain text, PDF-extracted content, OCR images and mixed research notes.
- Supports equations, matrices, tables, algorithms, theorems, proofs, citations, references and automatic input-type detection.
- Built a 20+ file torture-test benchmark; internal results document 100% accuracy on standard academic-paper, bibliography, dependency and fragment categories.

Tech: Next.js, TypeScript, PDF text extraction, Tesseract.js/OCR, parsing, validation and benchmark tests

CourseVault AI | Full-Stack Developer | 2026 [GitHub](#) | [Live](#)

- Built a 3D academic resource and bookmark manager with dynamic course folders, categorized materials and AI-assisted resource suggestions.
- Implemented Supabase authentication, server-side route guards, strict per-user RLS, CRUD workflows, profile handling and Zod validation.

Tech: Next.js, React, TypeScript, Supabase/PostgreSQL, RLS, Three.js, custom shaders, Tailwind CSS

Aircraft Maintenance Tracker v2 | Full-Stack Developer | 2026 [GitHub](#)

- Developed a role-aware maintenance management system for fleet records, scheduled tasks, defect reporting, sign-off workflows, operational alerts and audit history.
- Implemented JWT-based access control, REST APIs, MongoDB data models and security middleware including Helmet, CORS and rate limiting.

Tech: React, Vite, Node.js, Express.js, MongoDB, Mongoose, JWT, Render

ADDITIONAL PROJECTS

Qasas — Story Sharing Platform: Full-stack storytelling platform with authentication, publishing, emotion reactions, threaded comments, read-time tracking and visitor/story analytics. [GitHub](#) | [Live](#)

Falah — Ibadah & Amal Tracker: Responsive personal tracker with Google authentication, private Firestore data, prayer-time integration and optional AI-generated reflections. [GitHub](#)

EDUCATION

BRAC University — B.Sc. in Computer Science & Engineering | Expected Spring 2028

Relevant study: Data Structures & Algorithms, Machine Learning, Data Communications, software development fundamentals

Chuadanga Government College — HSC | GPA 4.92

Victoria Jubilee Government High School, Chuadanga — SSC | GPA 4.94

CERTIFICATION & LANGUAGES

Certification: Graphics Design — Extra-curricular activity, Residential Semester, BRAC University

Languages: Bangla (native); English (working proficiency)

PROFESSIONAL STRENGTHS

Product ownership, technical leadership, system thinking, security awareness, documentation, iterative debugging, AI-assisted development workflows, Bangla/Banglish localization, and clear written communication.
